

Program

Online educational sessions focusing on acute myeloid leukemia, chronic lymphocytic leukemia, B-cell lymphomas, and multiple myeloma will be made available pre-meeting to facilitate preparation for the face-to-face meeting.

Thursday 21 September 2017

09:00–09:15 **Welcome and introductions**

09:15–10:00 **Plenary session: Focus on multiple myeloma**

Educational objective:

- Discuss recent clinical data relating to the management of multiple myeloma and its potential impact on daily clinical practice.

10:00–10:15 *Grab-and-go coffee*

10:15–11:30 **Parallel workshop session**

Topic 1: Management of patients with previously untreated multiple myeloma

Educational objective:

- Explain the management of specific clinical situations in previously untreated multiple myeloma.

11:30–11:45 *Grab-and-go coffee*

11:45–13:00 **Parallel workshop session**

Topic 2: Management of patients with relapsed and/or refractory multiple myeloma

Educational objective:

- Explain the management of specific clinical situations in relapsed and/or refractory multiple myeloma.

13:00–14:00 *Lunch*

14:00–15:15 **Parallel workshop session**

Topic 3: Practical management of patients with mantle cell lymphoma

Educational objectives:

- Discuss recent clinical data relating to the management of mantle cell lymphoma and its potential impact on daily clinical practice
- Explain the management of specific clinical situations in mantle cell lymphoma.

Topic 4: Practical management of patients with follicular lymphoma

Educational objectives:

- Discuss recent clinical data relating to the management of follicular lymphoma and its potential impact on daily clinical practice
- Explain the management of specific clinical situations in follicular lymphoma.

Topic 5: Practical management of patients with Waldenstrom's macroglobulinemia

Educational objectives:

- Discuss recent clinical data relating to the management of Waldenstrom's macroglobulinemia and its potential impact on daily clinical practice
- Explain the management of specific clinical situations in Waldenstrom's macroglobulinemia.

Topic 6: Practical management of patients with acute myeloid leukemia

Educational objectives:

- Discuss recent clinical data relating to the management of acute myeloid leukemia and its potential impact on daily clinical practice
- Explain the management of specific clinical situations in acute myeloid leukemia.

15:15-15:45

Coffee

15:45-17:00

Parallel workshop session (as above)

19:00

Networking reception, followed by dinner

Friday 22 September 2017

09:00-09:45

Plenary session: Focus on chronic lymphocytic leukemia

Educational objective:

- Discuss recent clinical data relating to the management of chronic lymphocytic leukemia and its potential impact on daily clinical practice.

09:45-10:00

Grab-and-go coffee

13:15-14:45

Parallel workshop session

Topic 7: Challenging the paradigm in the management of patient with treatment-naïve chronic lymphocytic leukemia

Educational objective:

- Explain the management of specific clinical situations in treatment-naïve chronic lymphocytic leukemia.

11:15-11:45

Coffee

11:45-13:00

Parallel workshop session

Topic 8: Practical management of relapsed chronic lymphocytic leukemia in the era of novel therapies

Educational objective:

- Explain the management of specific clinical situations in relapsed chronic lymphocytic leukemia.

13:00-13:30

Closing plenary

From 13:30

Lunch and departures
